

„Over 60 Years Highest Quality“

R. Windhösel
Braids For Hoses Braided Sleeveings

EU Regulation 1907/2006 REACH dated 18th October 2006

We consider the conservation of the environment and natural resources in combination with the observation of national and international laws, applicable directives, standards and regulations to be a fundamental entrepreneurial obligation of highest priority.

In our own interest and against the background of high product safety we permanently pursue all modifications which apply to this area of application.

In keeping with the stipulations of Directive 1907/2006 the European Chemicals Agency (EChA) in its capacity as central point of control of REACH keeps a list of candidates which is regularly updated in keeping with the requirements.

In our own interest and against the background of high product safety we permanently pursue all modifications and appendixes which apply to Annex XVII, Annex XIV and candidates list SVHC.

On the basis of the definitions of Chapter (2), Article (3) of the Regulation and applied to the “products” of braid reinforced hoses and hollow braids, Rolf Windhösel GmbH + Co. KG applies “alloys” and “products”. Within the meaning of the Regulation, we assume the role of “downstream user” and supply products exclusively (non-chemical products).

Under normal and intended conditions of use, the products supplied by us do not contain any listed substance from the candidate list of 24.01.25 above the permitted limit.

For this reason Rolf Windhösel GmbH + Co. KG is not subject to the obligation to register.

We monitor any changes to the REACH regulation and the development of the REACH candidate list.. In conformity with Article (33) of the Regulation we shall inform you immediately if the components of our products are classified as especially alarming and the release is above the permitted limit of 0.1 per cent.
